

Mohamad Ali

Software Engineer

mohamadit102@gmail.com | +963 945 852 707 | [LinkedIn](#) | [Portfolio](#) | Damascus, Syria | Open to Relocation

PROFESSIONAL SUMMARY

Software Engineer experienced in taking production web products from requirements and system design through full-stack implementation, data modeling, deployment, and production operations. Strong hands-on experience with TypeScript/JavaScript, Node.js, React, Next.js, REST APIs, SQL/NoSQL databases, and Linux-based infrastructure. Proven ability to independently translate business and domain requirements into maintainable software, including enterprise platforms, real-time operational systems, service portals, and a browser-based CAD/drafting engine.

TECHNICAL SKILLS

Software Engineering: System Design, Requirements Analysis, SRS, UML, API Design, Database Design, Data Modeling, SDLC, Agile/Scrum, Performance Optimization

Programming Languages: TypeScript, JavaScript, SQL

Backend & APIs: Node.js, Express.js, REST APIs, Authentication & Authorization, API Integrations

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Canvas API

Databases & Data: MySQL, MongoDB, Prisma, Sequelize, Query Optimization

Infrastructure & Delivery: Docker, Linux (Ubuntu), Nginx, AWS, GitHub Actions, CI/CD, PM2

Version Control & Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

Software Engineer | Permitt.ai | Part-time Contract

Remote | Jun 2026 - Present

- Owned end-to-end delivery of the Permitt.ai web platform and production drafting application, translating product requirements into system design, implementation, deployment, and support.
- Built and evolved backend services, REST APIs, data models, and application workflows supporting the platform's engineering use cases.
- Managed Linux/Nginx production environments, CI/CD workflows, deployment processes, and release reliability for the live platform.
- Worked across frontend, backend, and infrastructure layers to improve maintainability, performance, and operational stability.

Full Stack Software Engineer | Foundr-x | Full-time Contract

Sep 2025 - May 2026

- Owned requirements analysis, technical design, and full-stack delivery of production web systems, translating business needs into data models, API contracts, and deployable workflows.
- Built and maintained SSR applications across Next.js and Node.js, with emphasis on maintainable system structure and reliable production behavior.
- Managed Linux/Nginx production environments, SSL configuration, deployment workflows, and operational stability for live services.
- Evaluated technology stacks, APIs, and database structures for scalability, maintainability, and production readiness.

System Analyst & Technical Consultant | TechnoPro | Full-time Contract

Jan 2025 - Aug 2025

- Owned requirements analysis and technical definition for custom enterprise management platforms, producing SRS documentation, UML models, workflows, data structures, and implementation-ready specifications.
- Worked directly across analysis and software execution, translating business processes into application logic and coordinating implementation through the SDLC.
- Coordinated cross-functional implementation through the SDLC using Agile practices, structured technical review, and clear delivery standards.
- Evaluated technology stacks, APIs, and database designs for maintainability, scalability, and production readiness.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Telsa | Full-time Contract

Jan 2024 - Dec 2024

- Owned the analysis and full-stack development of a custom e-commerce engine and a complete hotel reservation management system from the ground up.
- Designed relational data models, application workflows, and secure REST API integrations supporting booking, commerce, employee, and operational processes.
- Delivered the systems from business requirements through implementation, deployment preparation, and production readiness.

Junior Backend Developer | TechLine | Full-time Contract

Jan 2023 - Dec 2023

- Developed and optimized backend architecture and business logic for an enterprise insurance claims management system.
- Built secure REST APIs for claim submission, verification, and real-time tracking and designed relational schemas supporting core claims workflows.
- Optimized complex database queries and backend processing for reliability and maintainability.

SELECTED ENGINEERING PROJECTS

Permitt.ai Platform & Drafting Engine | Software Engineer | [Live](#)

- Engineered browser-based 2D/3D drafting capabilities covering coordinate mapping, screen-to-world conversion, dimensioning, geometry logic, and interactive state.
- Implemented 500+ optimized Canvas rendering functions and performance-sensitive geometry operations for interactive drafting workflows.
- Integrated the drafting layer with backend services and production workflows while maintaining data integrity and responsive application behavior.

Chafaq Field Ops Platform | Full Stack Software Engineer | Foundr-x | [Live](#)

- Implemented real-time field workflows, synchronization logic, and back-office dashboards supporting day-to-day operational teams and administrative visibility.
- Designed relational schemas, REST APIs, and synchronization flows supporting concurrent field updates and consistent application state.
- Built operational and administrative workflows that kept field and back-office views synchronized and improved day-to-day administrative visibility.

Promaster Service Portal | Full Stack Developer | [Live](#)

- Implemented customer booking and administrative workflows from provided business requirements, including supporting backend behavior and data structures.
- Built and integrated frontend components, backend services, REST APIs, and database interactions for day-to-day automotive service operations.
- Supported production deployment and domain routing while keeping the application maintainable and ready for continued feature development.

EDUCATION

Bachelor of Information Engineering (Software Engineering & Information Systems)

Syrian Private University | 2019 - 2024

German ZAB degree evaluation completed; official evaluation document available for employer and immigration requirements.
